**Turkey-Ankara: IPA - Supply of Equipment for Implementation of Stock Assessments in Fisheries Activities
2018/S 039-084303**

Corrigendum No: 1 to the CONTRACT NOTICE

Europeaid/139233/IH/SUP/TR

Turkey

(Supplement to the Official Journal of the European Union, 8.2.2018, 2018/S 027-058020)

Central Finance and Contracts Unit (CFCU), Ankara, TURKEY.

16. **Selection Criteria**

The following selection criteria will be applied to tenderers. In the case of tenders submitted by a consortium, these selection criteria will be applied to the consortium as a whole unless specified otherwise. The selection criteria will not be applied to natural persons and single member companies when they are sub-contractors:

1) Economic and financial capacity of tenderer (based on i.a. item 3 of the tender form for a supply contract). In the case of the tenderer being a public body, equivalent information should be provided. The reference period which will be taken into account will be the last 3 years for which accounts have been closed:

— Lot 1: the average annual turnover of the tenderer must exceed 1 500 000 EUR,

— Lot 2: the average annual turnover of the tenderer must exceed 100 000 EUR.

2) Professional capacity of tenderer (based on i.a. items 4 and 5 of the tender form for a supply contract). The reference period which will be taken into account will be the last 3 years from submission deadline:

— at least 5 staff must currently work for the tenderer.

3) Technical capacity of tenderer (based on i.a. items 5 and 6 of the tender form for a supply contract): The reference period which will be taken into account will be the last 5 years from submission deadline.

Lot 1:

— the tenderer has delivered supplies under at least 1 contract with a budget of at least 500 000 EUR (proportion carried out by the candidate) in the field of floating structures which was implemented during the following period: 5 years from the submission deadline (the start and end/completion dates of the references should be specified as day /month /year).

— the tenderer has delivered supplies under at least 1 contract with a budget of at least 200 000 EUR (proportion carried out by the candidate) in the field of water monitoring equipment which was implemented during the following period: 5 years from the submission deadline (the start and end/completion dates of the references should be specified as day /month /year).

Lot 2:

— the tenderer has delivered supplies under at least 1 contract with a budget of at least 100 000 EUR (proportion carried out by the candidate) in the field of IT equipment which was implemented during the following period: 5 years from the submission deadline (the start and end/completion dates of the references should be specified as day /month /year). This means that the contract the tenderer refers to could have been started or completed at any

Time during the indicated period but it does not necessarily have to be started and completed during that period, nor implemented during the entire period. Tenderers are allowed to refer either to contracts completed within

the reference period (although started earlier) or to contracts not yet completed. In the first case contract will be considered in its whole if proper evidence of performance is provided (statement or certificate from the entity which awarded the contract, final acceptance). In case of contracts still on-going only the portion satisfactorily completed during the reference period will be taken into consideration. This portion will have to be supported by documentary evidence (similarly to contracts completed) also detailing its value.

In case a tenderer applies to multiple lots, the tenderer should meet:

— for economic and financial capacity criterion, the cumulative amount of the average annual turnover required for the relative lots.

— for professional capacity criterion, cumulative number of staff required for the relative lots.

If the tenderer does not meet the required selection criteria for all the lots he applied, his tender will only be taken into consideration for the lot(s) he is qualified for. In this case, the contracting authority will choose the most favorable overall solution taking into account the financial offers and the discounts granted. In this respect, the tenderers have no preferences on the lots.

Capacity-providing entities:

An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links which it has with them. Some examples of when it may not be considered appropriate by the contracting authority are when the tenderer relies in majority on the capacities of other entities or when they rely on key criteria. If the tenderer relies on other entities it must prove to the contracting authority that it will have at its disposal the resources necessary for performance of the contract, for example by producing a commitment on the part of those entities to place those resources at its disposal. Such entities, for instance the parent company of the economic operator, must respect the same rules of eligibility and notably that of nationality, as the economic operator. Furthermore, the data for this third entity for the relevant selection criterion should be included in the tender in a separate document. Proof of the capacity will also have to be furnished when requested by the contracting authority.

With regard to technical and professional criteria, a tenderer may only rely on the capacities of other entities where the latter will perform the tasks for which these capacities are required.

With regard to economic and financial criteria, the entities upon whose capacity the tenderer relies, become jointly and severally liable for the performance of the contract.
